## IPM statement

It is the goal of Paramount Unified School District to implement IPM by focusing on long-term prevention or suppression of pests through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are to protect the health of the children through long-term pest prevention that minimizes the use of pesticides and is respectful towards the environment.

## IPM team

In addition to the IPM Coordinator, other individuals who are involved in purchasing, making IPM decisions, applying pesticides, and complying with the Healthy Schools Act requirements, include:

Name and/or Title	Role in IPM program
Sergio Espinoza	Operations staff representative
Johnny Greene	Grounds staff representative
Alicia Castillo	Custodial staff representative
Julian Solis	Administrative Support

## Pest management contracting

Pest management services are contracted to a licensed pest control business.

Pest Control Business name(s): American City Pest, IPM Tech and Integrated

Pest Control

Prior to entering into a contract, the school district has confirmed that the pest control business understands the training requirement and other requirements of the Healthy Schools Act.

## Pest identification, monitoring and inspection

Pest Identification is done by: District Operations Staff, American City Pest, IPM Tech and Integrated Pest Control

Monitoring and inspecting for pests and conditions that lead to pest problems are done regularly by Custodians, Operations Staff, Supervisors and results are communicated to the IPM Coordinator.

Specific information about monitoring and inspecting for pests, such as locations, times, or techniques include:

Monthly inspections are performed by Integrated Pest Control in the cafeteria areas of each school. Glue boards and small traps are used to monitor for pest activity in the cafeteria kitchens. School district personnel regularly visually inspect the remaining school areas for other pest activity.

## Pests and non-chemical management practices

This school district has identified the following pests and routinely uses the following non-chemical practices to prevent pests from reaching the action level:

## Chemical pest management practices

If non-chemical methods are ineffective, the school district will consider pesticides only after careful monitoring indicates that they are needed according to pre-established action levels and will use pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property and the environment.

This school district expects the following pesticides (pesticide products and active ingredients) to be applied during the year.

This list of pesticides can also be found on the district website.
